

Commercial runs likely to be delayed at Butadiene extraction unit of Chandra Asri

DATE : 2013-07-18

Chandra Asri is likely to delay commercial operations at a new Butadiene extraction unit (BEU). A Polymerupdate source in Indonesia informed that the company is likely to start trial runs at the plant by end-July 2013.

To be located in Cilegon, Indonesia, the plant has a Butadiene production capacity of 100,000 mt/year. The plant will be operated by Petrokimia Butadiene Indonesia, a fully-owned subsidiary of Chandra Asri.
