

ACN plant to be restarted by Ineos

DATE : 2013-06-27

Ineos is in plans to restart an acrylonitrile (ACN) plant following a maintenance turnaround. A Polymerupdate source in Germany informed that the plant is likely to restart in mid-July 2013. It was shut in mid-June 2013.

Located in Cologne, Germany, the plant has a production capacity of 100,000 mt/year.
