

Butadiene plant restarted by YNCC

RELEASED ON 06/06/13 (DD/MM/YY)

Yechun Naphta Cracking Centre (YNCC) has restarted a Butadiene plant. A Polymerupdate source in South Korea informed that the plant restarted on June 3, 2013. It was shut on May 9, 2013 for maintenance turnaround. Located in Yeosu, South Korea, the plant has a production capacity of 240,000 mt /year.
