

ACN line of Ineos to undergo maintenance

RELEASED ON 12/02/13 (DD/MM/YY)

Ineos is likely to shut operations at its acrylonitrile (ACN) line.

Located at Cologne in Germany, the ACN line has a production capacity of 200,000 mt/year.

The line will be taken off-stream in March 2013 for repairs and will remain shut for 10-12 days, according to a Polymerupdate source in Germany.
