

Syngenta plans to double India revenue

RELEASED ON 14/02/13 (DD/MM/YY)

Swiss agrochemical company Syngenta is planning to double its revenue from India in the next three years. India contributes less than 5% to the group's total turnover of \$14.2 billion.

"India is an emerging market for us. We expect to clock a double-digit growth in India driven by rice, corn and vegetables. We will be launching at least a dozen new varieties in the market this year," said Davor Pisk, chief operating officer, Syngenta.
