

UK could have 1.6 million hydrogen-fuelled vehicles by 2030

RELEASED ON 06/02/13 (DD/MM/YY)

The UK could have around 1.6 million hydrogen-powered vehicles on the roads by 2030, according to a joint government and industry study.

The UKH2Mobility project has this week predicted that an established market for fuel cell electric vehicles (FCEVs) could support annual sales of around 300,000 and reduce UK annual total vehicle CO2 emissions by three million tonnes in 20 years' time.
