

# Nissan Resonance Concept And 2014 Versa Note To Make Canadian Debut

RELEASED ON 29/01/13 (DD/MM/YY)

On February 14th the all-new 2014 Nissan Versa Note, Resonance Concept and JUKE NISMO will make their national debuts at the Canadian International Auto Show in Toronto (CIAS). The Versa Note 4-door hatchback, with segment-exclusive technology, outstanding fuel economy, smart packaging and class-leading cargo space, is the fourth of five new models launched by Nissan over 15 months. The Nissan Resonance concept signals the direction of future Nissan crossovers, and the JUKE NISMO is at the forefront of NISMO's new brand strategy. [...] The all-wheel drive Resonance concept also features an efficient hybrid electric drivetrain that includes Nissan's proprietary "one-motor, two-clutch" system, which combines a smaller displacement internal combustion gasoline engine with an electric motor/lithium-ion battery and advanced management system.
