

Bayer Got Registration of Flubendiamide in China

RELEASED ON 04/01/13 (DD/MM/YY)

Bayer CropScience received full registration of insecticide active ingredient flubendiamide in China while the provisional registration expired in September 2012.

Flubendiamide is a novel chemistry with new mode of action targeting site- Ca⁺ release channels. It can stop feeding of larvae immediately while safe with crop and environment.

There are another three companies including Nihon Nohyaku hold the registrations of flubendiamide at present.
