

# Vinyl acetate plant operated by Showa Denko at reduced rates

RELEASED ON 22/01/13 (DD/MM/YY)

Showa Denko is operating its vinyl acetate monomer (VAM) plant at curtailed levels.

A Polymerupdate source in Japan informed that the plant is presently running at 70% of production capacity.

Located at Oita in Japan, the VAM plant has a production capacity of 175,000 mt/year.
