

Approval gained for Proplant fungicide

RELEASED ON 18/01/13 (DD/MM/YY)

Proplant has been granted an extension of authorisation for minor use (EAMU) by the Chemicals Regulation Directorate for use in ornamental plant production and forest nurseries.

It is a semi-systemic fungicide with action against Pythium, Phytophthora and downy mildew. It already has on-label approval for use on protected broccoli /calabrese, Brussels sprouts and cauliflower, with an EAMU for other edibles expected soon, according to supplier Fargro.
