

Styrene plant to be shut by Styrolution

DATE : 2014-08-29

Styrolution is in plans to shut a styrene plant for maintenance turnaround. A Polymerupdate source in the US informed that the plant is likely to be shut towards the end of September 2014. It is expected to remain shut for around 30-35 days.

Located in Bayport, Texas, US, the plant has a production capacity of around 1.7 billion mt/year.
