

SM plant planned to be restarted by Idemitsu SM

DATE : 2014-09-12

Idemitsu SM Malaysia is in plans to restart its styrene monomer (SM) plant. A Polymerupdate source in Malaysia informed that the plant is planned to be restarted on September 15, 2014. It was shut for maintenance turnaround.

Located at Pasir Gudang in Malaysia, the plant has a production capacity of 240,000 mt/year.
