

Japan's MRC to shut acetone cyanohydrin-based MMA unit on 10 Sept

DATE : 2014-08-29

Japan's Mitsubishi Rayon Co (MRC) plans to shut its 107,000 tonne/year acetone cyanohydrin-based methyl methacrylate (MMA) line in Otake on 10 September for its bi-annual maintenance, a company source said on Friday.

The turnaround is expected to be completed around end-October, the source added.

The company also runs two 55,000 tonne/year butane-based MMA lines at the same site.
