

Japan's Mitsui Chemicals restarts 40,000 tonne/year MMA plant

DATE : 2014-08-01

Japan's Mitsui Chemicals has resumed production at its 40,000 tonne/year methyl methacrylate (MMA) plant at Sakai in Osaka earlier this week, a company source said on Friday.

The plant was taken off line earlier in mid-June for a scheduled maintenance.

Mitsui Chemical is currently one of six MMA producers in Japan.
