

VAM plant to be started by Sinopec Great Wall

DATE : 2014-08-27

Sinopec Great Wall Energy and Chemical Co will start trial runs at a new vinyl acetate monomer (VAM) plant.

A Polymerupdate source in China informed that trial runs at the plant will commence on August 26, 2014.

Located in Yinchuan, China, the plant has a production capacity of 450,000 mt/year.
