

SM plant to be restarted by Idemitsu

DATE : 2014-07-17

Idemitsu Kosan has planned to restart its Styrene Monomer (SM) plant. A Polymerupdate source in Japan informed that Idemitsu Kosan plant was shut on July 7, 2014 following a technical glitch. It now plans to restart the plant early next week.

Located at Chiba, Japan, the plant has a production capacity of 210,000 mt/year.
