

SM plant shut by SKGC

DATE : 2014-07-31

SK Global Chemical has shut a styrene monomer (SM) plant in South Korea. A Polymerupdate source in South Korea informed that the plant was shut on July 28, 2014 owing to weak demand fundamentals. It is expected to remain off-stream for the month of August.

Located in Ulsan, South Korea, the plant has a production capacity of 350,000 mt/year.
