

MMA plant likely to be restarted by MGC

DATE : 2014-08-09

Mitsubishi Gas Chemical (MGC) is likely to restart a methyl methacrylate (MMA) plant.

A Polymerupdate source in Japan informed that the plant is planned to be restarted next week. It was shut on July 20, 2014 owing to mechanical issues.

Located in Niigata, Japan, the plant has a production capacity of 40,000 mt/year.
