

SM plant planned to be restarted by Idemitsu SM

DATE : 2014-06-28

Idemitsu SM (Malaysia) is in plans to restart its styrene monomer (SM) plant.

A Polymerupdate source in Malaysia informed that the plant is planned to be restarted on July 1, 2014. The plant was shut on June 24, 2014 owing to technical issues.

Located at Pasir Gudang, Malaysia, the plant has a production capacity of 240,000 mt/year.
