

South Korea's Tongsoh Petrochem to restart No 4 ACN unit on 15 July

DATE : 2014-07-11

South Korea's Tongsoh Petrochemical plans to restart its 245,000 tonne/year No 4 acrylonitrile (ACN) line in Ulsan on 15 July, a company source said on Friday.

The unit was shut following a power outage on 8 July.

The company's other 245,000 tonne/year No 3 ACN line is operating at full, while its 70,000 tonne/year No 2 ACN line has been shut since end-March and the company has yet to fix a restart date.
