

# Japan's Mitsui Chemicals shuts 40,000 tonne/year MMA plant

DATE : 2014-06-12

Japan's Mitsui Chemicals has shut its 40,000 tonne/year methyl methacrylate (MMA) plant at Sakai city in Osaka, Japan, earlier this week for a scheduled maintenance, a company source said on Thursday.

The plant is expected to restart in end-July, the source added. Mitsui Chemicals is currently one of six MMA producers in Japan.
