

ACN plant of Ascend to be shut for maintenance turnaround

DATE : 2014-06-26

Ascend Performance Materials is in plans to shut an acrylonitrile (ACN) plant for maintenance turnaround.

A Polymerupdate source in the US informed that the company's A7 unit is likely to be shut in August 2014.

It is planned to remain off-stream for around two weeks. Located at Chocolate Bayou in Texas, US, the plant has a production capacity of 1 billion lb/year.
