

# Japan's Asahi Kasei to restart Mizushima ACN line in mid-April

DATE : 2014-04-04

Asahi Kasei's 200,000 tonne/year acrylonitrile (ACN) plant in Mizushima, Japan is expected to restart in mid-April, a company source said on Friday.

"The plant is going to restart around 15 April," the source said.

The plant was taken off line on 23 February for an around 15-day turnaround, according to an earlier story from ICIS.
