

# Taiwan's Formosa runs ACN plant at full capacity after restart

DATE : 2014-03-16

Taiwan's Formosa Plastics Corp (FPC) is running its 280,000 tonne/year acrylonitrile (ACN) plant in Mailiao at around 100% capacity after the completion of a turnaround, a company source said on Friday.

The ACN plant was restarted on 11 March, according to the source.

The plant was shut down in mid-February for scheduled maintenance the source said.
