

Butadiene plant planned to be shut by Tosoh for maintenance

DATE : 2014-02-04

Tosoh Crop is likely to take off-stream a **butadiene** plant for maintenance turnaround.

A Polymerupdate source in Japan informed that the plant is likely to be taken off-stream in mid-March 2014. It is slated to remain off-stream for about one month.

Located in Yokkaichi, Japan, the **butadiene** plant has a production capacity of 500,000 mt/year.
