

ACN plant likely to be shut by Dia Nitrix

DATE : 2014-01-28

Dia Nitrix is in plans to shut its acrylonitrile (ACN) plant for maintenance turnaround.

A Polymerupdate source in Japan informed that the plant is likely to be shut in early February 2014. It is expected to stay off-stream for around one month.

Located in Mizushima, Japan, the plant has a production capacity of 115,000 mt/year.
