

ACN plant restarted by Pemex Petroquimica

DATE : 2014-02-17

Pemex Petroquimica has restarted an acrylonitrile (ACN) plant following an unplanned outage.

A Polymerupdate source in Mexico informed that the plant was shut on February 12, 2014, owing to a power outage. It restarted two days later.

Located in the Gulf of Mexico state of Veracruz, the plant has a production capacity of 60,000 mt/year.
