

SM plant likely to be shut by LG Chem

DATE : 2014-02-13

LG Chem is in plans to shut a styrene monomer (SM) plant for maintenance turnaround.

A Polymerupdate source in South Korea informed that the plant is planned to be shut in mid-March 2014. It is likely to remain off-stream for around three weeks.

Located in Daesan, South Korea, the plant has a production capacity of 180,000 mt/year.
