

# Styrene plant likely to be shut by Westlake Chemicals

DATE : 2014-01-06

Westlake Chemicals is in plans to shut a styrene plant for maintenance turnaround. A Polymerupdate source in the US informed that the plant is likely to be taken off-stream in mid-January 2014. It is planned to remain off-stream for around two weeks.

Located in Lake Charles, Louisiana, the plant has a capacity of 570 billion lb/year.
