

New VAM plant of Ningxia Younglight to commence commercial production

DATE : 2013-01-11

Ningxia Younglight Energy Chemical is likely to commence commercial production at a new vinyl acetate monomer (VAM) plant. A Polymerupdate source in China informed that the plant is likely to start in March-April 2014.

To be located at Yinchuan, Ningxia province in China, the plant will have a production capacity of 450,000 mt/year. No 6 cracker planned to be shut by CPC Corp for maintenance.
