

SM plant planned to be restarted by Idemitsu Kosan

DATE : 2013-12-09

Idemitsu Kosan is in plans to restart its styrene monomer (SM) plant.

A Polymerupdate source in Japan informed that the plant is likely to restart on December 10, 2013.

It was shut on November 25 for repairs. Located at Chiba, Japan, the plant has a production capacity of 210,000 mt/year.
