

Production to be commenced at acrylic plant by Nippon Shokubai

DATE : 2013-12-20

Nippon Shokubai is in plans to commence production at its acrylic acid plant in Japan.

A Polymerupdate source in Japan informed that production at the plant is likely to commence in January 2014.

It was shut on September 29, 2012 after an explosion at an acrylic acid tank. Located in Himeji, Japan, the plant has a production capacity of 160,000 mt /year.
