

S Korea's Lotte Chemical to shut BD units in March and May

DATE : 2014-01-06

South Korea's Lotte Chemical will shut its 150,000 tonne/year butadiene extraction unit at Daesan for one week in March and its 130,000 tonne/year BD unit at Yeosu for four days in May, for maintenance, a company source said on Monday.

"We will shut the two BD units in Daesan and Yeosu for maintenance respectively in March and May for maintenance," the source added.
