

ACN plant of Pemex remains under closure

DATE : 2013-11-28

Pemex has shut its acrylonitrile (ACN) plant owing to shortage of feedstock propylene.

A Polymerupdate source in Mexico informed that the plant is under closure since November 21, 2013.

A restart date for the plant could not be ascertained. Located in Morelos, Mexico, the plant has a production capacity of 60,000 mt/year.
