

Ineos Nitriles restarting 4th reactor at Green Lake acrylonitrile facility

DATE : 2015-11-16

Ineos Nitriles, based on advantaged US raw materials and growing global demand, has made a decision to resume production on the fourth reactor at its Green Lake, TX, US, acrylonitrile plant. The action will reinstate 100,000 tonnes/y of capacity and bring the site's nameplate acrylonitrile capacity to 545,000 tonnes/y. A date for the restart was not given.
