

Lukoil to raise acrylonitrile capacity at Russian plant.

DATE : 2015-07-24

Lukoil Group, a local manufacturer of oil and chemicals, is expanding its acrylonitrile production capacity from the current 150,000 tonnes/y to 190,000 tonnes/y at its Saratovorgsintez site in Saratov, Russia. The expansion project is scheduled to be finished in 2016. The sodium cyanide capacity at the Saratovorgsintez site is also being improved from the current 18,000 tonnes/y to 30,000 tonnes/y, which will be completed in late 2015.
