

# China's Jilin Petchem to shut ACN lines for turnaround in May

**DATE : 2015-03-16**

China's Jilin Petrochemical plans to conduct maintenance at all four of its acrylonitrile (ACN) lines in May, a company source said on Monday.

The four ACN lines, which have a combined capacity of 452,000 tonnes/year, will be shut down for about a month, the source added.

Currently, Jilin Petrochemical is running its four ACN lines at 80% of capacity, the company source said.
