

Butadiene plant restarted by Lotte

DATE : 2015-01-29

Lotte Chemical has restarted its butadiene plant following a minor maintenance turnaround.

A Polymerupdate source in South Korea informed that the plant restarted on January 28, 2015. It was shut a week back for a minor turnaround.

Located in Daesan, South Korea, the plant has a production capacity of 150,000 mt/year.
