

Ascend Performance Materials completes development of new loading facilities for acrylonitrile

DATE : 2015-02-10

On 4 Feb 2015, Ascend Performance Materials announced that it has developed new railcar, tanker truck and ISO container loading facilities for deliveries of acrylonitrile in North America. This new capability for loading and delivery of acrylonitrile by railcar, tanker truck and ISO container throughout North America complements Ascend's previously existing barge and ship (export) delivery capability. Ascend is now proceeding with customer trials and deliveries throughout North America.
