

S Korea's Lotte Chemical to shut Daesan BD unit in January

DATE : 2015-01-18

South Korea's Lotte Chemical will shut its 150,000 tonne/year butadiene extraction unit at Daesan for one week in January for maintenance, a company source said on Monday.

"The BD unit at Daesan will shut from 20 to 27 January for maintenance," the source said.

The company's other 130,000 tonne/year BD unit in Yeosu will run at full rate during this period, the source added.
