

S Korea's Tongsoh plans turnarounds for ACN units in May, Oct 2015

DATE : 2014-12-12

South Korea's Tongsoh Petrochemical is expected to shut its Ulsan-based 245,000 tonnes/year No 4 acrylonitrile (ACN) plant in May 2015 for scheduled maintenance lasting a month, a company source said on Friday.

The company's No 3 ACN line with the same capacity at the same site is going to be taken offline in October next year for a month-long maintenance, the source said. .

The two plants are running at 90-95 % currently.
