

Russia's SIBUR restarts butyl-A production at Dzerzhinsk facility

DATE : 2014-11-05

Russia-based major Sibur has restarted production at its butyl acrylate (butyl-A) facility, in Dzerzhinsk, and output is running as normal, a source from the company confirmed on Wednesday.

The turnaround began in October.

Sibur has the capacity to produce 34,000 tonnes/year of butyl-A at the facility, which is based in the eastern industrial area of Dzerzhinsk, Nizhny Novgorod in Russia.
