

SIBUR to begin 2-week turnaround at butyl-A facility in H1 Oct

DATE : 2014-10-02

Russia-based major SIBUR will start planned maintenance at its butyl acrylate (butyl-A) facility, in Dzerzhinsk, on 6 October, a source from the company confirmed on Thursday.

The turnaround is scheduled to end on 17 October, the source added.

Sibur has the capacity to produce 34,000 tonnes/year of butyl-A at the facility, which is based in the eastern industrial area of Dzerzhinsk, Nizhny Novgorod in Russia.
