

ACN unit in Germany to be restarted by Ineos

DATE : 2014-10-02

Ineos is in plans to restart one of two lines at an acrylonitrile (ACN) unit following maintenance turnaround. A Polymerupdate source in Germany informed that the unit is planned to be restarted over this weekend. It is under a five-week shutdown.

Located in Cologne, Germany, the plant has a production capacity of 210,000 mt/year.
