

SAP ACCESS

Getting SAP Access

Requests for SAP access can be sent to Customer Support team via portal [SBS Support](#). Application forms are required for some systems.

Rhodia Legacy

- Request for new access / modification to WP1 / WGP (GTS) / WAP (APO). Download [form](#) here.
- Request for new access / modification to WBP (BW). Download [online form](#) here.

For Rhodia Legacy systems, approvals from managers will be done in GRC CUP. Users should complete form by providing a reference user ID, roles, or transaction codes required. If approving manager is not indicated in form, please enquire user for manager's name.

Solvay Legacy

- Request for new access to PF1 / PRS / PA1 (APO). Download [form](#) here.

For Solvay Legacy systems, email approvals from managers must be forwarded together with the application forms to [SBS Support](#) via portal. If no forms are attached, users should minimally provide either reference user ID or transaction codes required.

For new access / modification to other SAP systems, please provide job description or scope or transaction codes to allow the team to assign the appropriate access.
