- 2 - Search Engine
- 3 - User Profile
- 4 - Print the page, see notification, create a message and the information helpdesk of Ariba
- 5 - Create Sourcing Projects
- 6 - Manage Tasks like library, prepackage reports

The screenshot displays a SaaS application interface for 'Arkive Sourcing Management'. The layout includes a sidebar on the left with navigation links: 'HOME', 'SOURCES', 'SUPPLIERS', and 'FOR YOU'. The top navigation bar features a search bar with the placeholder text 'Search using Title, ID, or any other term' and a user profile icon. The main content area is titled 'Welcome to Arkive Sourcing Management' and contains a table of documents. The table has columns for 'My Documents', 'Date', and 'Status'. The documents listed are 'Single Event', 'Outsourced sourcing project', 'Outsourced sourcing project', 'New ID', 'New ID', 'Logistics ID', and 'New knowledge project'. The 'Status' column shows 'Pending Selection', 'Draft', 'Draft', 'Draft', 'Active', and 'Active' respectively. The table is filtered by 'December 2021' and shows a total of 6 documents. The 'Status' column is highlighted in blue.
