

Qlik sense Access management

We have different dashbaords(Apps) available in Qlik sense.

Following links will be very useful for Access management.

Qlik sense QMC Production

<https://qliksense.syensqo.com/sso/qmc/>

Qlik sense HUB

<https://qliksense.syensqo.com/>

Note:Only for SPM DASHBOARD access

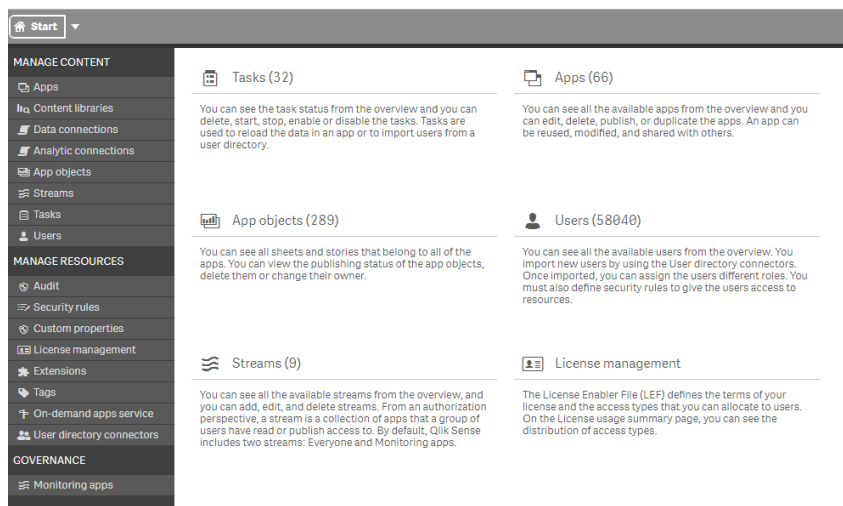

Once access is provided we need to update the SPM-Qlik sense Google spreadsheet document

General Steps to provide access to dashbaords in Qlik sense

Steps for Access creation

Step 1: Open the Qlik sense QMC production link

<https://qliksense.syensqo.com/sso/qmc/>

Step 2:

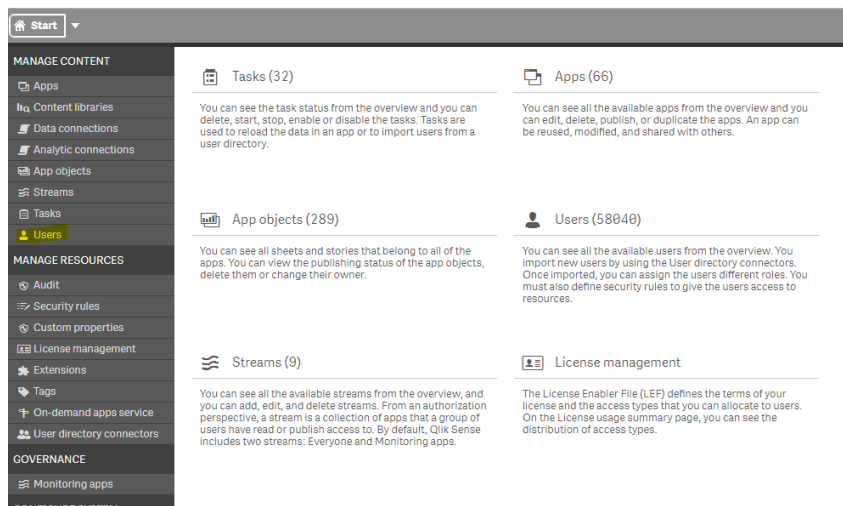

For example, we take SPM dashboard.

SPM application is published in the SDE stream. Edit the app.

[blocked URL](#)

Now, you see the value associated to the application in the Custom Properties section.

Step 3: Navigate to USER tab.

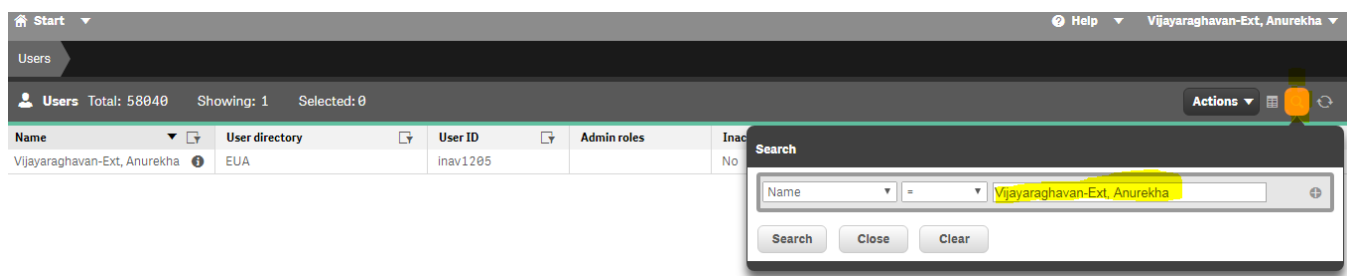

Step 4: Under the user tab we can see the list of users available in Qlik Sense.

Name	User directory	User ID	Admin roles	Inactive	Blocked	Removed extensions	Tags
Brandt-ext, Jerome	EUA	be004308		No	No	No	
Demeuse-ext, Pierre	EUA	be004309		No	No	No	
THMPP21MGR	EUA	thmpp21mgr		No	No	No	
IAmigo Installer	EUA	usmgamig		No	No	No	
IAutomation, OFI	EUA	usmgofi		No	No	No	
IBenefits	EUA	usmgbenefits		No	No	No	
IDrawing Room	EUA	usmgd9a		No	No	No	
iIPad Workbooks	EUA	us72180		No	No	No	
iNetscan	EUA	inetscan		No	No	No	
IProcess Control	EUA	process		No	No	No	
IScanning, OCR	EUA	usmgocr		No	No	No	
IShaft, Four	EUA	ishaft4		No	No	No	
IUser, Null	EUA	usmgoox		No	No	No	
IUtility, Surface	EUA	usmgout		No	No	No	
\$templat WAR	EUA	\$templat.war		No	No	No	
\$TEMPLATE, AUB	EUA	utempla2		No	No	No	
\$TEMPLATE, AUD	EUA	\$template_aud		No	No	No	

Step 5: Under the search option, type the user name or user ID of the user after which the user will be listed.

(the search by name is not 100% reliable).

Step 6: We can also search multiple user at a time by using the option available.

Step 7: In order to provide or update the user's access, double click and open the user.

Step 8: After opening the user, navigate to Custom Properties tab

Step 9: Under the APP Viewer tab update the user access with the role.
