

A1415 - Search for suppliers' qualifications with the Search Tool

Overview

The Search Tool is a new way to search throughout your suppliers qualifications.

Take all qualified suppliers for the site Tavaux as an example. Before, four searches had to be performed on the Geographical axis: at Tavaux level, at France Level, at EMEA level and finally at worldwide level. With the Search Tool, it is done in one step.

In the same way, global searches can be performed on the Organisational axis or on the GPS axis. Let's say you look for qualified suppliers in Spectrometry: the Search Tool will also display suppliers qualified for all Laboratory Equipment and Supplies.
