Got a question?

Thank you for your input. This is the first version of app for news which does not include the navigation of Solvay ONE. You can also visit on your mobile browser at <https://one.solvay.com> and this version of responsive does include. We will keep you updated should we have a new app version that includes the navigation! 😊

Should you encounter any issues using the app, please do not hesitate to contact: webcommunications@solvay.com

You see the SSO log in page. Use your normal network log in and password. You just need to log in once.

The ONE mobile app can only be downloaded if your phone is enrolled to MDM. Please contact your local ServiceDesk and they will guide you through to enroll your phone to MDM.

Check [ONE APP overview](#)

- Add articles to "my favorites" to read them when you are in OFFLINE mode.
- Videos cannot be played when you are in OFFLINE mode.
- When you are in OFFLINE mode and if you only see the title, this is normal because the app hasnt got time to get a full download of contents. Do reconnect ONLINE to read more!

Majority of the links in Solvay One are google documents. For this type of link, you will be redirected and asked to log in to access to drive. Use your normal network log in and password.

The notification feature is not yet available. It is envisaged for a future version.

The ONE mobile app only displays the main content of the news. If you would like more details, please refer to the web version.

It is recommended to flip over your phone in landscape mode for a better display.
