

How to clone a Node

If you want to reuse an existing model of content-page, you can use the "Clone" mode.

1) Go to the administration content page.

2) Find the content you want to clone and click the arrow, at the right, to open the drop down menu.

3) Click "clone".

The screenshot shows the 'Content' administration interface. At the top, there's a yellow header bar with navigation links and user information. Below it, a 'Content' section has tabs for 'Content', 'Files', 'Scheduled content', 'Media', and 'Simple mega menu list'. The 'Content' tab is active, showing a list of content items. The list has columns for 'TITLE', 'CONTENT TYPE', 'AUTHOR', 'UPDATED', 'CURRENT REVISION STATE', and 'OPERATIONS'. The first item, 'Can a fiber improve your well-being?', is selected. Its 'OPERATIONS' menu is open, showing options: 'Edit', 'Clone' (highlighted with a red box), 'Translate', and 'Delete'. Other items in the list include 'Solvay Flux GmbH', 'To be deleted', 'How to make fertilizer use more sustainable?', 'Can tires reduce fuel consumption and car emissions?', and 'Tolcide® Sales Team.'.

TITLE	CONTENT TYPE	AUTHOR	UPDATED	CURRENT REVISION STATE	OPERATIONS
Can a fiber improve your well-being?	Basic page	Nathalie	07/14/2018 - 13:02	published	Edit, Clone, Translate, Delete
Solvay Flux GmbH	Contact	Helen Heinel	07/14/2018 - 12:51	published	Edit, Translate, Delete
To be deleted	Brands	Helen Heinel	07/14/2018 - 12:49	published	Edit, Translate, Delete
How to make fertilizer use more sustainable?	Basic page	Nathalie	07/14/2018 - 12:47	published	Edit, Translate, Delete
Can tires reduce fuel consumption and car emissions?	Basic page	Nathalie	07/14/2018 - 12:26	published	Edit, Translate, Delete
Tolcide® Sales Team.	Contact	maya.vanard@so...	07/13/2018 - 12:19	published	Edit, Translate, Delete

4) Proceed with clicking "clone", once more, at the end of the new page that appears.

Home > Clone Content

Specify the child entities (the entities referenced by this entity) that should also be cloned as part of the cloning process. If they're not included, these fields' referenced entities will be the same as in the original. In other words, fields in both the original entity and the cloned entity will refer to the same referenced entity. Examples:

If you have a Paragraph field in your entity, and you choose not to clone it here, deleting the original or cloned entity will also delete the Paragraph field from the other one. So you probably want to clone Paragraph fields.

However, if you have a User reference field, you probably don't want to clone it here because a new User will be created for referencing by the clone.

Some options may be disabled here, preventing you from changing them, as set by your administrator. Some options may also be missing, hidden by your administrator, forcing you to clone with the default settings. It's possible that there are no options here for you at all, or none need to be set, in which case you may simply hit the *Clone* button.

ENTITIES REFERENCED BY FIELD *TABS* (FIELD_ *TABS*).

☒ Clone entity ID: 13786, Type: paragraph - tab, Label: Can a fiber improve your well-being? > Tabs

ENTITIES REFERENCED BY FIELD *CONTENT* (FIELD_ *CONTENT*).

☒ Clone entity ID: 13781, Type: paragraph - wysiwyg, Label: Can a fiber improve your well-being? > Tabs > Content

ENTITIES REFERENCED BY FIELD *SIDEBAR* (FIELD_ *SIDEBAR*).

☒ Clone entity ID: 13791, Type: paragraph - links, Label: Can a fiber improve your well-being? > Tabs > Sidebar
